

# Prefilters

## Extend the Life of Your Filter Elements

### Overview

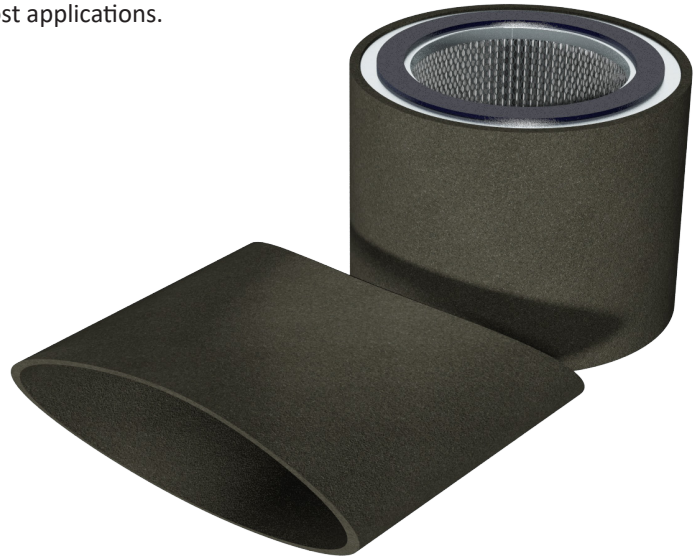

Foam prefilters extend the life of Solberg filter elements by adding an additional preliminary layer of filtration. Prefilters are suitable for most applications.

### Features

- Foam wrap material construction
- Dust loading capacity is increased by 40-50% with a prefilter added to the filter element
- Minimal impact on pressure drop

### Options

- Heat stamping for custom imprinting
