

Oil Mist Eliminator Worksheet

Customer Name:	Classification:
Contact:	
Application Information	
Equipment Type (Turbine, Compressor, etc.) and OEM Bran	d:
Retrofit or New Installation:	
If retrofit, what is currently installed?	
Application Conditions	
Vented flow (CFM or m³/hr):	
Vented air temperature (°F or °C):	
Vacuum or pressure requirement in oil reservoir (inches H ₂	O or millibar):
Static or Vacuum Assist:	
Oil Type (mineral or synthetic):	
Oil Grade (eg. VG46):	
Construction and Electrical Specifications	
Motor voltage required:	
Frequency (Hz):	
Motor phase (single or three phase):	

Oil Mist Eliminator Worksheet

Construction and Electrical Speci ications Continued
Explosion Proof and Hazardous Area requirements (Ex, ATEX, etc.):
Components that require ATEX certification (canister, blower, etc.):
Ambient temperature (minimum and maximum):
Materials of construction and finish coating:
Connection sizes (inlet and outlet):
Welding, inspection, testing requirements (provide supporting documents):
Accessories
Gauge requirement (include required units of measure):
Vacuum control - manual or automated (VFD):
Pressure relief / check valve requirement (include relief pressure):

Application Notes:
